

DATA STORY-TELLING

MINING SUPPLY SALES PERFORMANCE -JULY 2025

.Our July sales were strong ,but they are driven by handful of high-value products,while we are also moving high volumes of less profitable items.

.To boost profitability ,we should focus more on our high-revenue “star” products and rethink the strategy for our high-volume,low -returns items.

. Our sales data reveals we are prioritizing “quantity” over “QUALITY” in some areas ,and shifting that focus will significantly increase our revenue.

IN A NUTSHELL: JULY showed strong sales needs refinement. While our total revenue is healthy ,its heavily concentrated in a few key products like Jackhammers and Generators.Conversely,we are selling high volumes of some lower-priced items that contribute very little to our bottom line .Our daily sales trend is consistently upward ,providing the underlying demand is there .This means we have a clear opportunity to be more efficient and profitable .Lets shift our focus from simple moving volume to actively promoting our high-value ,high-margin “star” performers.
